

EXPERIENCES AND ORGANIZATIONS

Software Engineer

September 2025 – present

CHAMP Cargosystems

- Implemented the UI and API of switch user and customer on the OCP platform using Spring Security and OAuth for password hash validation, allowing session persistence on multi-tab navigation
- Created classic CDMP configuration's search and create screens for route lane combination

Junior Software Engineer

September 2024 – September 2025

CHAMP Cargosystems

- Implemented dynamic component rendering with a common shared form and service for all reports and dynamic display of action buttons
- Applied caching of search results when back button is clicked from drilldown screen from consignment search
- Presented CDMP progress as part of Innovation & Insights Wednesday
- Conducted knowledge transfer sessions on Teachable Machines and Fast Access Implementation

Junior Software Engineer I

March 2023 – September 2024

CHAMP Cargosystems

- Migrated CDMP Neo to a newer version of Angular
- Served as backup scrum master for stand-up meetings and backlog refinement
- Won 1st-runner up on iNOTOC during the 2024 CHAMP and IATA-organized hackathon
- Finished the initial consignment drilldown screen with dynamic status colors and header size based on number of notifications
- Created the foundation for the milestone box component to be reusable across screens with dynamic display based on set parameters
- Implemented redirection of valid AWB number to its corresponding consignment search drilldown screen
- Contributed to solving critical and major Sonar issues in the monitoring tool service
- Created documentations for challenging Jira tickets and for processes that could improve team velocity
- Consistently aligned the old Jira tickets to the new deployment process

Associate Back-End Developer

June 2021 – August 2021

Chimes Consulting

- Rendered effort for enhancing Accounting and HR systems
- Developed e-mail automation to clients with notifications linked to each project
- Limited pages' visibility and read/write access with custom user roles

Peer Adviser, Mapúa Center for Student Advising | March 2019 – March 2022

- Mentored students in programming and mathematics courses

Delegate, HUAWEI Developer Day Philippines | November 2019

EDUCATION

Mapúa University | August 2018 – March 2022

BS Computer Science, *Specialization: Artificial Intelligence*

Thesis: Analyzing Lexical and Prosodic Features of Bilingual Job Interviews in Predicting Employment Probability

- Awarded Rank 10 among President's Listers for 2 terms with GWA of 1.2
- Granted Full Academic Scholarship for 9 consecutive terms

SKILLS

Software Development

Java, Python, C++, OOP, Spring Framework, Agile, Android Studio

Web Development

AngularJS, PHP, XAMPP, MERN, Bootstrap, FastAPI, UI/UX Design

Artificial Intelligence

Classification, Regression, NLP, Tensorflow Keras, OpenCV, Jupyter

Database

Oracle, MySQL, MongoDB, SQLite

SCHOOL AND PERSONAL PROJECTS

Artificial Intelligence/Machine Learning/Data Science

- Co-developed cursor movement translation through gesture detection using Deep Learning
- Produced predictive analytics on rotational churner with PyCaret and Cosine Similarity
- Created extractive and abstractive summarization using PageRank and Cosine Similarity
- Created sentiment analysis using Twitter API and Orange Data Mining
